

The Use of HENCO 9090 ECA-Water on Ships

The vision

The right solution to a problem today is not only a solution that is effective, but also a solution that takes into account the environment, its people and animals and of course their future.

Our solutions can help you and your crew take the necessary considerations to ensure that the United Nations 17 world goals are met.

Application- areas for ECAwater

Indoor climate:

The indoor climate can be improved in most places.

The indoor climate is of great importance for the well-being of individuals and for their long-term health.

Disinfection:

Most places are disinfected according to current rules and recommendations. Unfortunately, many recommendations are often outdated.

We offer the latest technology in disinfection and guarantee the best results in the world.

Cleaning:

Cleaning thoroughly in all places is of the utmost importance today. Proper cleaning secures everyone and everything for both the short term and the long term. Proper cleaning is an important part of a healthy indoor climate.

Maintenance:

Maintenance ensures functionality, stability and will often save a lot of time and money due to unnecessary costs and fees.

Application- areas for ECAwater

Food safety:

Food safety is crucial to personal development, stability and health. A single accident can be fatal to the crew. We can help ensure that food safety is optimal.

Personal hygiene:

Hand disinfection and personal hygiene is crucial for staying healthy and warding off viruses. Protect yourself and protect your fellow crew members.

Clean drinking water:

Clean, potable water is one of the world's biggest problem. In most cases, water is filled with microorganisms, pesticides and other undesirable substances. Drinking water on board yachts is often stored in reservoirs which are at high risk of contamination by microorganisms and bio-film. We can ensure that your water remains potable and free of pollutants.

Swimming pool / Spa:

Activated Water can replace all chemical additives such as chlorine and acid in a swimming pool. The water becomes cleaner and free of harmful chemical reactions to the swimmer.

Products

Electrostatic sprayers Treatment and disinfection of surfaces.

ECA-Water ECAWater is one of the world's most effective disinfectants and can be used virtually anywhere.

ECA Water Desi Disinfection and sterilization of surfaces, foods and hands.

ECA Water Ren Natural mild degreaser for all surfaces.

ECA Water Drink Potable drinking water without any microorganisms and with a significant reduction in pesticides.

Electrostatic Spray Gun.

An electrostatic spray gun offers the fastest and safest method for disinfecting any surface.

The electrostatic effect ensures that the liquid agent reaches the "impossible" places allowing penetration on all surfaces including the unattainable micro-pores and difficult angles. No space is left untreated.

ECA-Water / **Activated** Water is the world's most effective and safest biocide.

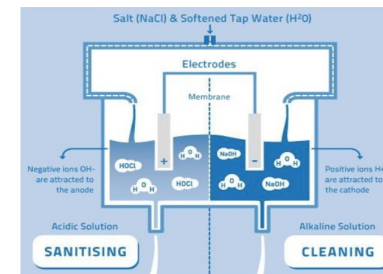

Activated Water is made of salt, water and electricity. That's it!

Activated Water can be made in various concentrations and can be used on both surfaces and in drinking water.

No microorganism is resistant to **Activated** Water, so the product is a perfect solution for hospitals, food companies, general cleaning and disinfection, the treatment of swimming pools hand makes for the best hand disinfection on the market.

When using **Activated** Water for disinfection, no rinsing is necessary. Just let it dry.

With **Activated** Water you can replace the vast majority of chemical cleaners.

Activated Water Desi is the world's most effective and safest

biocide. **Better disinfection:**

- 2 - 5 times greater effect than free chlorine
- Better security in the galley

No chemicals:

- No use, no storage and no handling of dangerous chemicals
- No possibility of over dosing
- Better working environment for the crew
- Less impact on the environment

Activated Water Clean can replace; in large part, all the chemical products used today for cleaning.

Activated Water Clean can easily dissolve fat, has a high cleaning effect, combined with disinfectant properties, is non-toxic, does not cause corrosion and skin irritation, and is environmentally safe to use.

After use, it turns back to water and salt without the formation of Toxic compounds - xenobiotics.

HENCO's drinking water purification systems is arguably the world's best and most effective. Drinking water, which is often stored in tanks, can become contaminated by microorganisms. Drinking water treated by a **HENCO** machine can be consumed without risk and will be much healthier than most other drinking waters available. The **HENCO** machine has low operating costs.

- ✓ No chemicals
- ✓ No bacteria
- ✓ No problems

Activated Water Hand disinfection

ECA-Water / **Activated** Water Desi is the most effective hand disinfectant on the market.

No microorganisms are resistant to **Activated** Water. No chemicals enter the body.

Activated Water Desi improves skin suppleness and minimizes the risk of microcracks and thus the risk of contamination. Follow **HENCO's** hand hygiene recommendations to ensure optimal performance.
