

HENCO SOLUTIONS

HENCO 9050 – Hand disinfection

Made in Denmark

HENCO SOLUTIONS ApS Research and Development is responsible for the creation of new products and technologies.

HENCO SOLUTIONS ApS is involved in the creation of tailored chemical and technological solutions for our corporate clients.

Our products represent the highest quality and exceptional performance combined with an excellent environmental and safety profile.

Our services are provided by our certified technicians.

HENCO 9050

*The world's best and most effective
liquid disinfectant.*

HENCO 9090 Activated Water is harmless to humans, animals and the environment. HENCO 9090 Activated Water is a highly effective disinfectant that effectively kills microorganisms. Activated Water is approved for use without subsequent rinsing. HENCO 9090 Activated Water is free chlorine which is also naturally produced in the body to fight inflammatory conditions. No microorganisms have survived the encounter with HENCO 9090 Activated Water and no microorganisms that form resistance.

Please feel free to contact us, for any further information

HENCO 9050

HENCO 9090 Activated Water is the product of a special electrolysis of mineralized water and is produced by an ECA machine which converts the water into efficient biocide using electricity. The active component of HENCO 9090 Activated Water is free chlorine (HOCl), which is the most effective chlorine disinfectant in liquid form. HENCO 9090 Activated Water/free chlorine is pH neutral. Free chlorine is naturally produced in the body to fight inflammatory conditions.

HENCO 9090 Activated Water is made of water, salt and a little power. It is the world's most effective liquid disinfectant. Harmless, environmentally friendly and effective. No risk of bacterial immunity No risk of skin and mucosal problems. HENCO 9090 Activated Water is biodegradable and in nature it turns into water and salt again. HENCO 9090 Activated Water does not emit toxic chlorine gas or other toxic gases Efficiency: Has wider antimicrobial spectrum than other biocides and stronger effect. Safety: Not toxic as other liquid disinfectants. Even the concentrated solution is not harmful if you accidentally drink it.
