

HENCO SOLUTIONS

HENCO 4070 – Solar Panel Cleaner

Made in Denmark

HENCO SOLUTIONS ApS Research and Development is responsible for the creation of new products and technologies.

HENCO SOLUTIONS ApS is involved in the creation of tailored chemical and technological solutions for our corporate clients.

Our products represent the highest quality and exceptional performance combined with an excellent environmental and safety profile.

Our services are provided by our certified technicians.

HENCO 4070 – Solar Panel Cleaner

It is important to clean your solar panels periodically to ensure maximum energy production and efficiency. Dust, debris, and bird droppings can accumulate on the surface of solar panels over time, which can reduce their ability to capture sunlight and convert it into electricity. This can lead to a decrease in energy output and a lower return on your investment in solar energy.

Regular cleaning of your solar panels can also help extend their lifespan, as dirt and other debris can cause scratches or other damage to the surface of the panels over time. In addition, keeping your solar panels clean can help ensure that your warranty remains valid, as many manufacturers require regular cleaning as part of their maintenance requirements.

Overall, while solar panels do not require frequent cleaning, it is a good idea to have them cleaned periodically to keep them operating at peak efficiency and to protect your investment in renewable energy.

HENCO 4070 Solar Panel Cleaner is engineered for removing of dust build-up, bird's droppings and other air pollution, where time, performance, environment and personal safety are equally important.

Cost, performance and environmental profile

- ❖ Exceptional performance and cost advantage compared to any other solar panel cleaners in the market.
- ❖ High foaming.
- ❖ Excellent environmental profile.
- ❖ Effectively remove insoluble salts .
- ❖ Phosphate free.
- ❖ VOC free.
- ❖ Reduce maintenance and labor costs, increase overall value.
- ❖ Solar panels remain cleaner for a longer period of time.
- ❖ Not DOT regulated; offers lower transportation cost.
- ❖ Can be delivered in dilution rate 25:1 or 50:1
- ❖ Not irritant to skin.

Please feel free to contact us, for any further information

HENCO 4070 – Solar Panel Cleaner

To avoid damaging your panels while cleaning them yourself, make sure you use the proper supplies. Do not use:

- Harsh soaps such as strong detergents or soaps that contain chemicals as they can be corrosive to the solar panel unit's surface.
- Rough cleaning instruments such as abrasive cloths and sponges, or heavily toothed brooms, as these, can scratch the surface of your panels

Locations that may require more frequent cleaning:

If your Solar Park is positioned within close range of a highway or a construction site – both of which will produce excess airborne debris, you will need to practice more frequent solar panel cleaning.
