

HC 5020

Antti Graffiti Protection - Permanent anti-graffiti coating

PRODUCT DESCRIPTION:

Clear, one-component, moisture-cured silicone elastomer anti-graffiti coating that can be applied with a brush, roller, and professional spray equipment on exterior surfaces.

A permanent coating that does not require repainting after graffiti removal, unlike alternative sacrificial systems. Graffiti is removed with a cold water pressure wash at approximately 100 bar without the need for additional cleaning agents.

- Removal of graffiti with water pressure
- Durable film for external exposure
- Flexible at low temperatures
- Applicable to various surfaces
- Easy application
- Can be painted over
- Breathable film
- Resistant to sinking
- Pigmentable
- Hydrophobic
- Heat-resistant
