

HC 5050

TILE, FACADE, AND WOOD CLEANER

For effective and rapid removal of atmospheric dirt, deposits, moss, mold, tile grout, oil, grease, and more.

PRODUCT DESCRIPTION:

HC 5050 is a water-based concentrated cleaning agent used for removing atmospheric dirt, moss, deposits, mold, tile grout, oil, grease, and more.

HIGHLIGHTS AND FEATURES:

- Easily and visibly cleans the surface of atmospheric dirt, moss, deposits, mold, and tile grout
- Suitable for use on all surfaces (avoid aluminum and plastic)
- Leaves the surface clean and ready for post-treatment with HC 5051 once it's completely dry
- Biodegradable
- Does not harm plant life
- Gentle on surfaces as deposits dissolve quickly, making it easy to clean the surface gently with water afterward
- Fast-acting
- Dilute at a ratio of 1:30-40 depending on the level of dirt and application.

APPLICATION:

Clean the surface with HC 5050 for best results. Apply it generously to a dry surface using a backpack sprayer, creating foam on the surface. HC 5050 dissolves deposits, dirt, algae, tile grout, and grime. The solution will color the foam in yellow, green, orange, or ochre hues depending on the level of dirt. Allow it to sit for approximately 15 minutes, then rinse HC 5050 away with a high-pressure washer or use a stiff brush. Afterward, the surface will be gently cleaned and completely free of bacteria and algae infestations. HC 5050 is biodegradable and eco-friendly. It does not harm grass and plants. Once the surface is dry, you can apply HC 5051 to maintain a clean and deposit-free surface for many years.
